

**CONGRATULATIONS YOU HAVE JUST BOUGHT
THE COOPERSONIC**

GERMANIAC

**ALL YOU NEED TO KNOW IS THAT THIS PEDAL IS A VINTAGE STYLE GERMANIUM FUZZ
USING "NOS" GERMANIUM TRANSISTORS, TRUE BYPASS,
USE A BATTERY OR BOSS TYPE ADAPTER (9VDC CENTRE NEGATIVE),**

TRY IT ON BASS, SYNTHS ETC TOO.

**MANIA CONTROL - "WHY IS IT MAKING THAT CRAZY NOISE?"
WITH THE MANIA CONTROL AT ZERO, WHAT WE HAVE IS A SIMPLE TWO KNOB FUZZBOX,
FOR YOUR VINTAGE 60'S FUZZTONES.**

**IF YOU WANT TO GO INTO MORE EXPERIMENTAL TERRITORY, THEN THIS IS WHY WE'VE
ADDED THE MANIA CONTROL. AS THE MANIA IS TURNED UP, A MORE VICIOUS FUZZ
RESULTS, WITH MORE INSTABILITY. IF YOU GO FURTHER THE UNIT WILL START TO
SELF-OSCILLATE, AND THE MANIA AND FUZZ CONTROLS BECOME QUITE INTERACTIVE.
CHANGING THE PICKUP SELECTOR OR VOLUME ON YOUR GUITAR WILL ALSO AFFECT
THE NOISES IT MAKES - TRY IT AND SEE...THIS CONTROL IS MOST EFFECTIVE
IF THE GERMANIAC IS DRIVEN DIRECTLY FROM YOUR GUITAR RATHER THAN AFTER
OTHER PEDALS OR IN AN EFFECTS LOOP.**
